

## Did You Know?

Most people throw away their used sneakers every 125-200 days without ever thinking about recycling. Since sneakers are manufactured with materials that are not biodegradable, they remain in landfills or are incinerated, which leads to toxic chemicals in our air and soil.

The process of manufacturing sneakers produces large amounts of CO<sub>2</sub> which contributes to the serious effects of climate change and global warming. Recycling and reusing sneakers keeps sneakers out of landfills, reduces the need for manufacturing new shoes and sneakers, and supports a growing circular economy.

### Here's how you can help:

Drop your sneaker donations off at  
Keep Islip Clean, 660 Main Street, Islip today!
